

## Remote - ME-ARC

This advanced feature remote offers the same simple push button operation of the ME-RC with advanced features and setup menus. The ME-ARC features a **Favs** button for storing up to five of your favorite setup menus, a **Control** button for fast easy control of the inverter, charger, and generator,

meter button with AC and DC meters, advanced setup menus, and advanced tech menus.

**Easy-to-read:** The large LCD screen and at-a-glance LEDs display the inverter / charger status in a straight-forward way. Soft keys give simple access to menus and a rotary encoder knob makes it easy to quickly scroll through menus and select settings.

**Non-volatile memory:** Critical settings are saved even if the power is disconnected.

**No cross platform confusion:** The ME-ARC remote is the same remote used on all Magnum

inverter / charger models in the ME, MS, MS-PAE, RD, MM, and the MMS Series lines.

A standard 50' 4-wire, twisted pair cable allows for plenty of room to display the Remote with ease.

## Router

The ME-RTR is a combination of the ME-ARC advanced feature remote and a communication

hub for MS-PAE parallel units all in one easy-to-install and operate unit. The ME-RTR features full inverter / charger setup and control, four-line LCD display, four parallel stacking ports for the MS-PAE Series inverter / charger, communication ports for ME-AGS-N or ME-BMK accessories, and a two wire voltage controlled auxiliary relay. The user-friendly LCD display and rotary "Select" knob

allows all connected MS-PAE Series inverter / chargers to be programmed in sync without the need to program each inverter separately.
